

Laboratory Fridge

LR 0° +15° C

- 2 versions, steel epoxy coated white colour or stainless steel
- 10 models with capacities from 130 to 2100 litres
- solid doors realized with the same insulation and material as the structure
- 2 levels for the controls, standard and PRO
- internal fitting with open wire shelves and mix-up possibility shelves-drawers
- internal lighting
- forced-air refrigeration
- automatic defrost with evaporation of condensate water

Freezer Upright

LF -5° -20/-25°C

- 2 versions, steel epoxy coated white colour or stainless steel
- 10 models with capacities from 140 to 2100 litres
- solid doors realized with the same insulation and material as the structure
- 2 levels for the controls, standard and PRO
- internal fitting with open wire shelves and mix-up possibility shelves-drawers
- internal lighting
- forced-air refrigeration
- automatic defrost with evaporation of condensate water
- temperature until -25°C (-20°C in some models)

ACCESSORIES AVAILABLE

Safety door lock with key

Temperature chart recorder

Freezer Chest

BLCF -16° -26°C

- realized in steel epoxy coated white colour and aluminium inside
- 7 models with capacities from 130 to 440 litres
- counter-balanced insulated lid with security locking (excluded mod. 130)
- digital-electronic temperature control (dial for mod. 130)
- internal fitting with wire baskets
- internal lighting (excluded mod. 130)
- static refrigeration
- temperature until -26°C (depending from the model)

Laboratory Combined Refrigerator/Refrigerator

LCRR +2° +8° C / +8° +15° C

- realized in stainless steel both in- and outside
- 4 models with capacities from 625 to 2100 litres
- 2 separate compartments, completely independent between them
- solid doors realized with the same insulation and material as the structure
- 2 levels for the controls, standard and PRO
- internal fitting with open wire shelves and mix-up possibility shelves-drawers
- internal lighting
- forced-air refrigeration
- automatic defrost with evaporation of condensate water
